Static and Dynamic Website

Static Website

A static website is a collection of web pages that are coded and created using HTML, CSS, and JavaScript. Each page of a static website is a separate HTML file that exists on the web server. The content of each page is pre-written and does not change unless the developer manually updates it. Static sites are the most basic type of website and are suitable for smaller websites that do not require frequent updates or advanced features.

Advantages of Static Websites:

- Speed
- Security
- Cost-effective
- Simple Hosting

Disadvantages of Static Websites:

- Limited Functionality
- Time-consuming updates
- Lack of Interactivity: Static websites do not allow users to interact with the content on the site in real time.

Examples of Static Websites:

- Brochure Websites
- Personal Websites
- Portfolio Websites

O FIRMIE

DLACZEGO WARTO WYBRAĆ NEW CAMPSITE?

Pod marką NewCampsite firma oferuje pobyty wakacyjne w nowoczesnych domach w stylu holenderskim (w pełni wyposażone, klimatyzowane domy z werandami oraz internetem) znajdujących się na zagospodarowanych obszarach kempingowych z bogatą infrastrukturą w bezpośrednim sąsiedztwie plaż.

Już w tym sezonie zapraszamy Państwa do skorzystania z promocyjnych ofert na pobyty weekendowe oraz wakacyjne w powyższych miejscowościach. W kolejnych latach mamy zamiar rozwijać dla Państwa nowe kierunki turystyczne oparte o

Dynamic Websites (Web Applications):

A dynamic website is a collection of web pages that are created using server-side scripting languages like NodeJS, PHP, ASP, or Ruby. The content of a dynamic website is generated on the server side and can change depending on user input or other factors. Dynamic websites can perform complex functions like e-commerce, user login, and database integration.

Advantages of Dynamic Websites:

- Interactivity
- Rich Features
- Scalability
- Customizability

Disadvantages of Dynamic Websites:

- Slower Speed
- Complexity
- Security Vulnerabilities

Examples of Dynamic Websites:

- E-commerce Websites
- Social Networking Websites
- Online Applications
