

Tools required to get started

List of concepts involved :

1. Installation of VS code editor.
2. Installation of supportive extensions.

Why VS Code ?

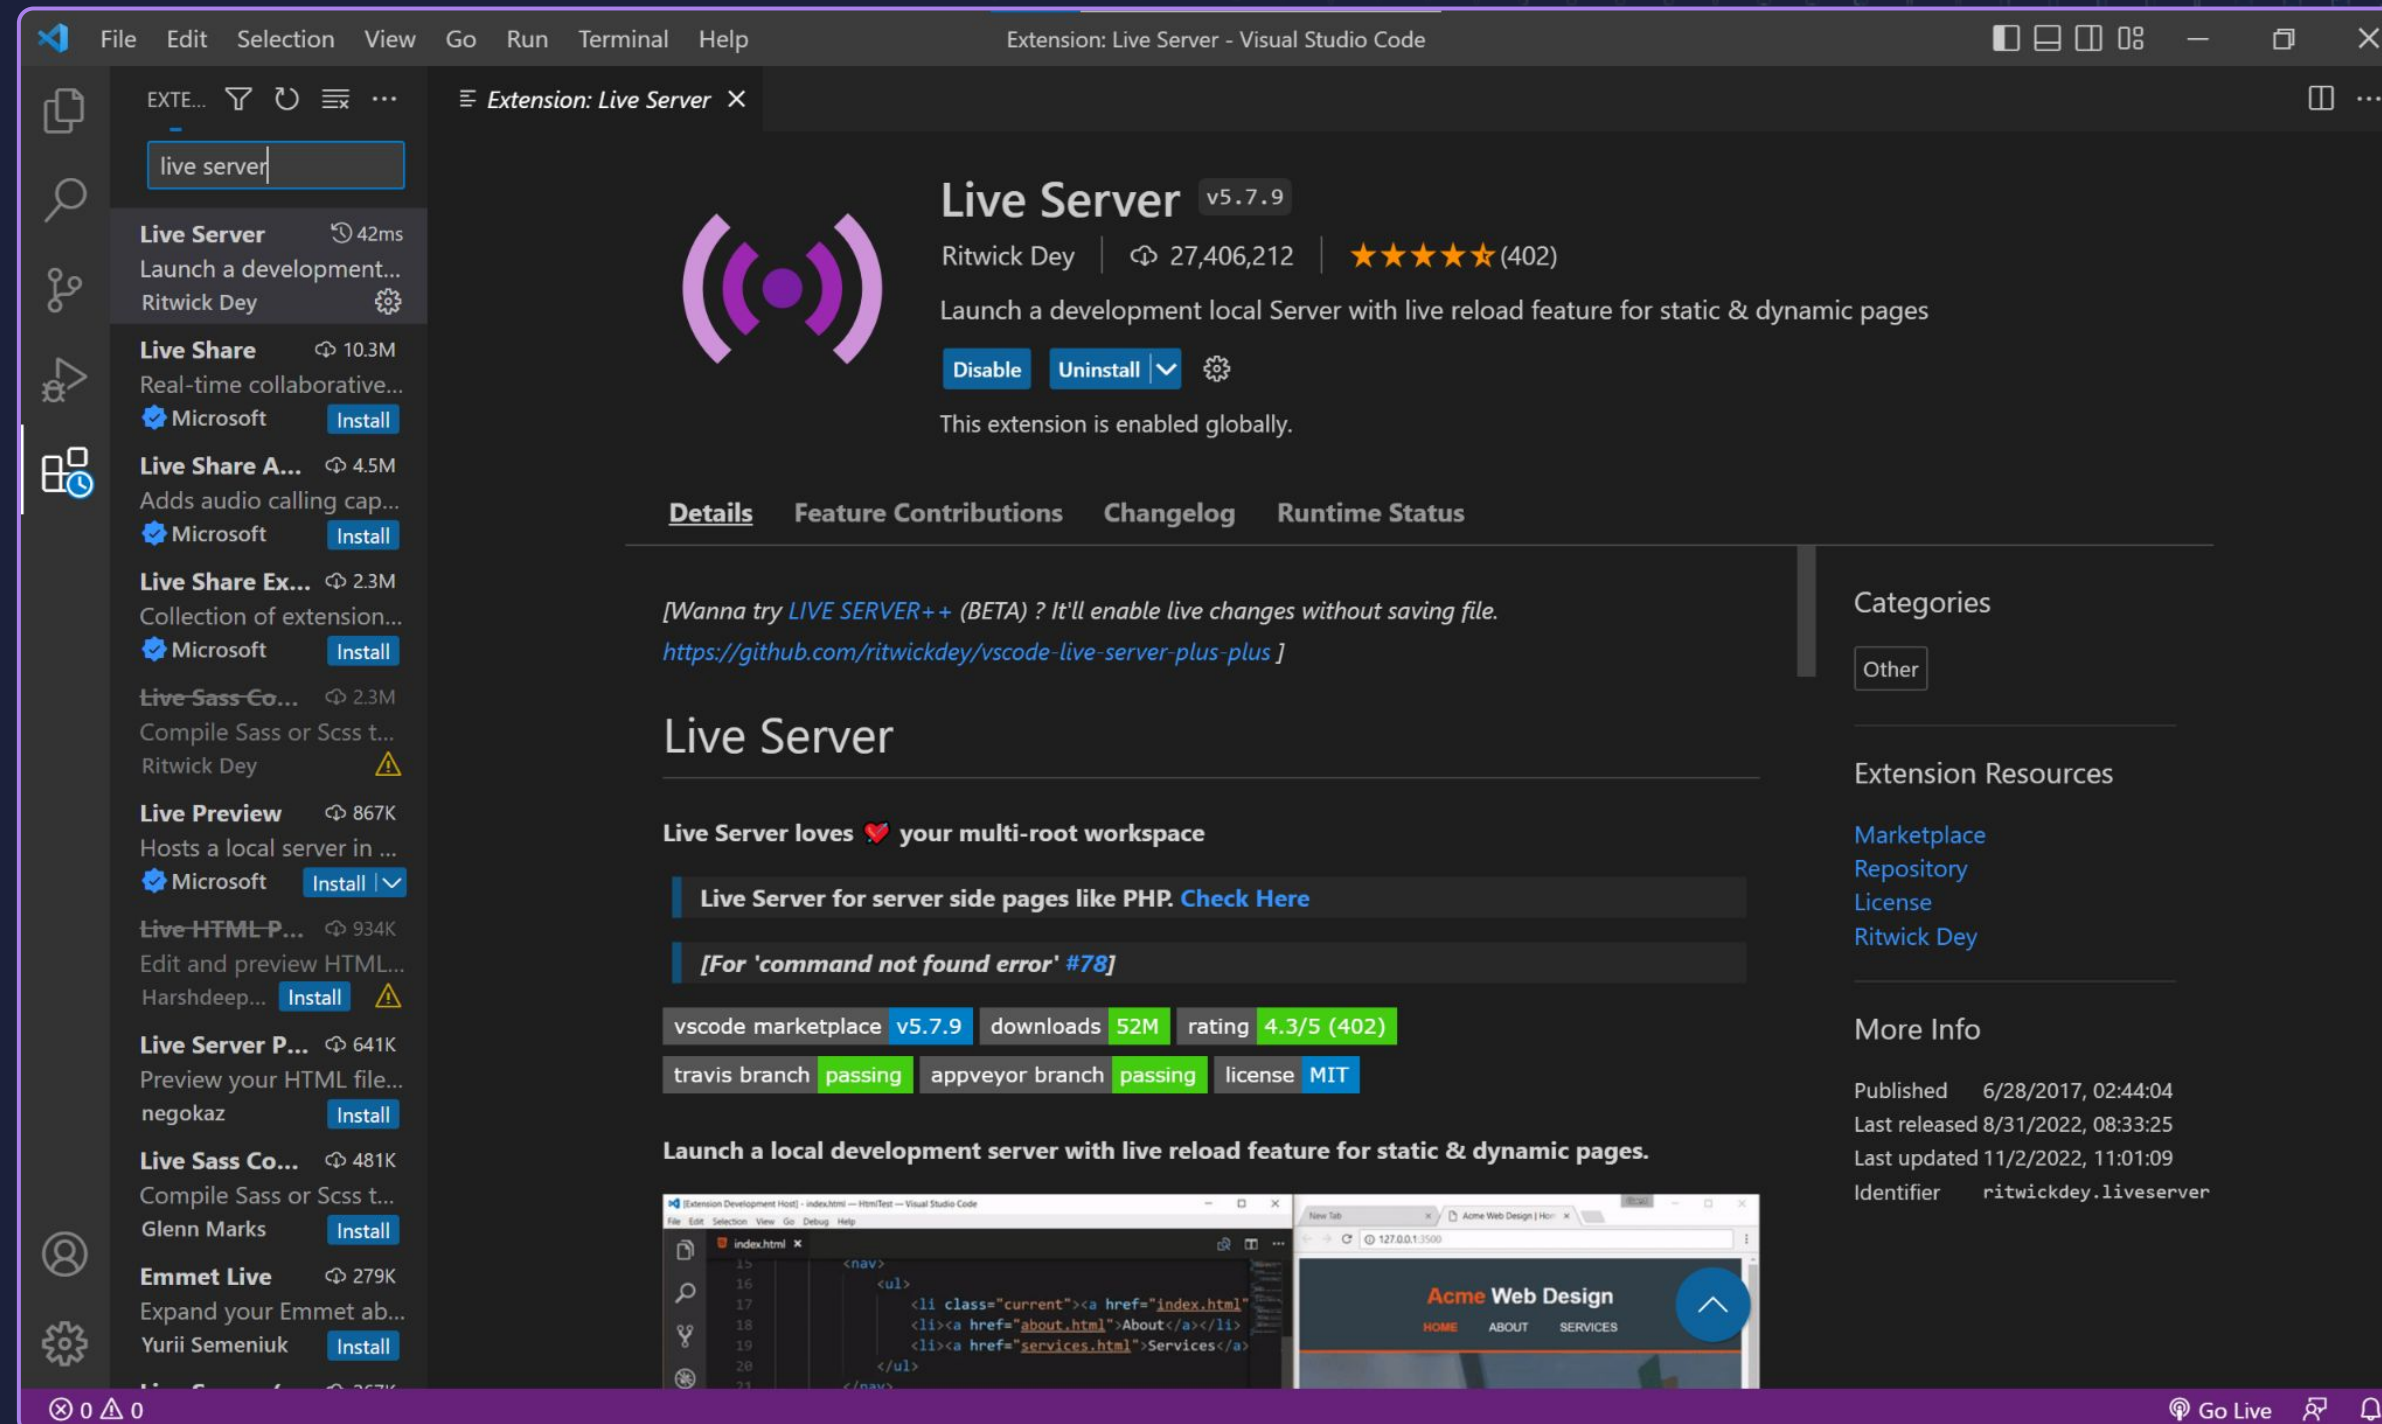

- VSCode is the most popular code editor developed by Microsoft.
- It is simple and free for use.
- It is available for various operating systems be it windows, mac or linux. Many developers use it for various development tasks.
- It has a large user base.
- Community support is good, if any issues are found it can easily be found on the internet.

Installation of VS Code

- For Windows
- For Mac

Installation of Extensions

- Live Server

The screenshot shows the Visual Studio Code interface with the 'Live Server' extension page open. The left sidebar shows a list of extensions with 'live server' searched. The main panel displays the 'Live Server' extension details, including its version (v5.7.9), author (Ritwick Dey), and a description: 'Launch a development local Server with live reload feature for static & dynamic pages'. The extension is currently installed and enabled globally. Below the description, there are tabs for 'Details', 'Feature Contributions', 'Changelog', and 'Runtime Status'. The 'Details' tab is active, showing a link to the GitHub repository and a note about 'LIVE SERVER++ (BETA)'. The 'Live Server' section highlights its multi-root workspace support and provides a link to check for server-side pages like PHP. A status bar at the bottom shows 'Go Live' and other icons.

Extension: Live Server - Visual Studio Code

Live Server v5.7.9
Ritwick Dey | 27,406,212 | ★★★★★ (402)

Launch a development local Server with live reload feature for static & dynamic pages
