

Lecture – 3

Introduction Of Web Application

Web application or web development

- What is web development ?
- Goal of web development ?
- What you will be able to do after this knowledge ?

Basics

Front End

Web interface:
HTML, CSS, JS

ReactJS, Angular, VueJS

Tailwind, bootstrap

Mobile apps

What I see

Back End

Everything at server

APIs, Authentication

Database like MySQL, mongo

Business logics

What I process and store
